

MILC SCRATCHBOARD® Singlemode Mode Cable

The Megalodon Difference

Singlemode (SM) Mode Cables designed and manufactured by Megalodon provide an accurate bundle, high performance and temperature insensitive cable for SM cable systems. Importantly, the low density, superior optical performance, strong, rugged, compact design and guaranteed return made from brass for increased durability and ease from the elements. Our MILC connectors also provide the optimal performance.

KEY BENEFITS

- 100% stress relief for long term life
- Cable provides excellent bend radius
- High fiber count for high capacity
- High performance for long term life
- High performance for long term life
- High performance for long term life
- High performance for long term life
- High performance for long term life
- High performance for long term life
- High performance for long term life

APPLICATIONS

- Long distance transmission
- High speed data transfer
- High speed data transfer
