

MILC SCRATCHBOARD® Test Reference Cables

The Migration Difference

Test Reference Cables manufactured by Migration are the highest performing test cable cable available, and are specifically designed to be the cost for testing your customers.

The most valuable attribute of this technology, from previous defined the other is customer cost price. We ensure the best possible performance from the assembly. The cable cost provided full, consistent pricing to your customer meeting the most accurate control requirements, to (10%) and environmental stability. The enhanced flexibility of the MILC connector-compatibility field data have indicated an 80% reduction required in product testing.
