

1.2mm Singlemode BIC Patch Cables

The Megalodon Difference

Megalodon 1.2mm Singlemode (BIC)

Patch Cables carry the work of

connecting and connecting without compromising Megalodon's durability of the cable. The 1.2mm cable meets 1/3 of the coiling count of a typical 2.0mm cable, but without any compromise to durability and cable strength. The BIC laser process is applied to all connectors, and creates industry-leading performance and durability.

For more information on Megalodon's BIC process and products, please visit megalon.com.

KEY BENEFITS

- 27.5dB lossless, 100µm BIC
- The performance of the BIC cable is superior to other cables
- Low insertion loss
- Full compatibility with standard LC and BIC connectors

APPLICATIONS

- Data Center
- Telecommunications
- Data Center & Network
- Healthcare
- Law Enforcement
