

MIL-STD-883C Test Reference Cables

The Megatron Difference

Test Reference Cables manufactured by Megatron are the highest performing test cable cable available, and are specifically designed to the strict test for testing your equipment.

The most valuable attribute of this category, test process defined test cable is uniform cable quality to ensure the best possible performance from the assembly. The cable has proven MIL connector design to ensure consistent connectivity that ensures optimal performance, to MIL and worldwide standards. The uniform quality of the MIL connector-compatibility test cable has resulted in the reduced repair in product testing.

KEY BENEFITS

- Superior Test Reference Cable
- Manufactured using finest cables
- Available in all major connector to test type
- Superior cable performance
- High standard quality
- Available for test equipment

APPLICATIONS

- High Speed Performance Testing
- Manufacturing test
- High speed test only
- Global Access applications
- Low cost solutions
