

MEGLADON[®]

MANUFACTURING GROUP, LTD.

A Telcel Technology Family Company

LCX Singlemode Splitters

The Megladon Difference

The compact, space saving design of Megladon's **LCX Singlemode (SM) Splitters** offers flexibility in FTTx and RPOC deployments.

Megladon builds each splitter with superior physical and performance characteristics that have been proven reliable in a variety of field applications. Each splitter is custom built with specified fiber and connector types, and are compatible with the LCX footprint.

For more information on Megladon's HLC[®] process and products, please visit megladonmfg.com.

KEY BENEFITS

- Excellent HLC[®] Termination Process
- 99.99% available durable mating surface
- Low Insertion Loss
- Variety of Fiber Types
- Split Ratio Range: 50/50 Custom
- Bi-Directional Transmission
- Excellent Case Performance
- Compact Unit Footprint
- Multiple Connector Options

APPLICATIONS

- Test Equipment
- Video Networks
- Local Area Networks
- Optical Fiber Sensors
