

MEGLADON[®]

MANUFACTURING GROUP, LTD.

A Teller Technologies Family Company

HLC[®] SCRATCHGUARD[®] Singlemode Node Cables

The Megladon Difference

Singlemode (SM) Node Cables designed and manufactured by Megladon provide an extremely durable, high-performance and temperature-insensitive cable for CATV (cable television) deployments. We have carefully selected Hytrel Purcation Tubing, unique breakout epoxies and grommets custom made from brass for increased durability and seal from the elements. Our HLC connectors also provide elite optical performance.

For more information on Megladon's HLC process and products, please visit megladonmfg.com.

KEY BENEFITS

- Scratch-resistant durable fluting surface
- Cable protected with 20" NPT thread, watertight
- Hybrid Purcation Tubing for temperature insensitivity
- HLC Connectors for best in class durability and optical performance
- Available with all major connector types
- Custom length and breakout types available
- 3-12 fiber available
- Variety of SM glass types available, including bend insensitive

APPLICATIONS

- CATV (Cable Television)
- Broadband Networks
- Connect Optical Distribution to Backbones Fiber
