

High-Density Rack Mount Fiber Management Panels

The Megalodon Difference

High-Density Rack Mount Fiber

Management Panels offer unsurpassed

fiber density and performance. Panels are capable of supporting 144 fibers in 48U, 144 fibers in 36U, and 120 fibers in 36U. The panels support high-density 960-fiber configurations that allow for multiple 960-fiber deployments, and have built-in fiber management components. Access is simplified through front and rear port access, and a convenient top panel.

For more information on Megalodon's 960-fiber panels and products, please visit megason.com.

KEY BENEFITS

- Compatible for use with up to 960 fibers
- High-density management features without extra air flow
- Available in 36U and 48U versions
- Heavy-duty frame and internal modules are built using a steel cabinet design

APPLICATIONS

- Data Centers
- Campus Offices
- Corporate Data Hubs
- Hospitals
- Government Building Networks
- ISP / Core Applications
