

MEGLADON[®]

MANUFACTURING GROUP, LTD.

A Teller Technologies Family Company

HLC[®] SCRATCHGUARD[®] Test Reference Cables

The Megladon Difference

Test Reference Cables manufactured by Megladon are the highest-performing fiber optic cables available and are specifically designed to be the ideal cord for testing fiber optic connectors.

Our team carefully selects all of the components, from precision-drilled ferrules to controlled core glass, to ensure the best possible performance from the assembly. We apply our patented HLC termination process to every connector, ensuring the best possible optical performance (IL & ORL) and unsurpassed end-face durability. The extended durability of the HLC connectors ensures better test data over extended use and reduced expense in product testing.

For more information on Megladon's HLC process and products, please visit megladonmfg.com.

KEY BENEFITS

- Exclusive HLC Termination Process
- Scratch-resistant durable mating surface
- Available in all major connector & fiber types
- Exceptional Optical Performance
- High Precision Materials
- Custom-built for test application

APPLICATIONS

- Fiber Optic Performance Testing
- Manufacturing Union
- Fiber Loss Test Sets
- Optical Return Loss Fixtures
- Lab Instrumentation
